IN THE CLAIMS:

02

104. (Amended) A method for the production of gold metal particles, comprising the steps of:

- a) generating an aerosol of droplets from a liquid wherein said liquid comprises a gold metal precursor;
 - b) moving said droplets in a carrier gas;
- c) removing a portion of droplets from said aerosol, wherein said removed droplets have an aerodynamic diameter greater than a preselected maximum diameter; and
- d) heating said droplets to remove liquid therefrom and form gold metal particles comprising at least about 50 weight percent gold metal, wherein said droplets have a size distribution such that at least about 80 weight percent of said droplets have a size of from about 1 μ m to about 5 μ m.
